In Lab Exercise 4

“joins (outer & inner), group by, aggregation”

Database Systems Lab

Spring 2023

Department of Computer Science

FAST-NU, Lahore, Pakistan

Exercise

For this exercise use the following schema, the script to create this schema and populate data is given in ATM.SQL file

	userId	name	phoneNum	city	
1	1	Ali	03036067000	Narowal	User
2	2	Ahmed	03036047000	Lahore	
3	3	Aqeel	03036063000	Karachi	
4	4	Usman	03036062000	Sialkot	
5	5	Hafeez	03036061000	Lahore	

	userID	cardNum	
1	1	1234	UserCard
2	1	1235	
3	2	1236	
4	3	1238	

	cardNum	cardTypeID	PIN	expireDate	balance	
1	1234	1	1770	2022-07-01	43025.31	Card
2	1235	1	9234	2020-03-02	14425.62	
3	1236	1	1234	2019-02-06	34325.52	
4	1237	2	1200	2021-02-05	24325.3	
5	1238	2	9004	2020-09-02	34025.12	

	cardTypeID	name	description	
1	1	Debit	Spend Now, Pay Now	CardType
2	2	Credit	Spend Now, Pay later	

	transId	transDate	cardNum	amount	
1	1	2017-02-02	1234	500	Transaction
2	2	2018-02-03	1235	3000	
3	3	2017-05-06	1236	2500	
4	4	2016-09-09	1238	2000	
5	5	2015-02-10	1234	6000	

Inlab

- 1- Find the total number of unique users of each **cardType**.
- 2- Show the card numbers and user names whose balance is in the range (Min: 2000, Max: 4000).
- 3- Show the name of those users who do not possess any card.
 - a- using set operation
 - b- using join
- 4- Show the id of those cards along with the card type name and the owner's name for which no transaction has been carried out in the last year. (Do not hardcode the year as 2018. To get current year you can use year (**getdate()**)).
 - a- using set operation
 - b- using join
- 5- For each card type, show the total number of cards whose total sum of transaction amount is greater than 6000. Consider only the transactions carried out in the period 2015-2017.
- 6- List the user id, name, phone number, city of those users whose card is expiring within the next 3 months. Also show the card number along with card type name.
- 7- Show the user id and name of those users whose total balance is equal to or greater than 5000. It is possible that a user has more than 1 card. In such a case, you will have to take sum of balance of each card of the user.
- 8- Show those card pairs which are expiring in the same year.
- 9- Show those user pairs whose names' first characters are the same.
- 10- Show the name and id of those users who possess both the credit card and the debit card.
- 11- Show the City name, number of users and the sum of amount of the users from same city.
